Case Study swisscom

<http://www.swisscom.com>

business benefits.

Web Essentials allows Swisscom to flex according to need and be innovative with the latest technology.

With a good working understanding and a common framework, the websites are built quickly and in a standardized manner.

Furthermore, through our network in the TYPO3 community, we are able to consult with Neos/Flow core developers which made the solution cutting edge.

company brief.

Swisscom is Switzerland's leading telecom provider and the leading full outsourcing partner for Banks in Switzerland. Swisscom's headquarters are in Ittigen, near the capital city Berne. With over 21,000 employees, it generated a turnover of CHF 11.7 billion in 2014.

Swisscom is one of the most sustainable companies in Switzerland and Europe.

project brief.

Provide web development capacity for multiple websites. Keep the build and support costs down while providing appealing, functional websites based on Neos.

The larger sites will be upgraded on TYPO3 CMS.

what we did technically.

- ✓ Swisscom's web development team needed flexible capacity for many websites. They decided on Neos for the smaller sites and TYPO3 for the larger sites - some had 100+ extensions.
- ✓ Web Essentials built a common Neos platform that maximizes the capabilities of Neos while providing a standardized approach for easier maintenance. We also built most of the sites ourselves.
- ✓ Using Neos, Docker, Grunt (Compass, Assemble), we pushed the boundaries of the possible.

” Web Essentials allows Swisscom to flex according to need.“

Swisscom

about webessentials.

Web Essentials is a leading provider of website and web development services. Founded on Open Source and ethical values we help clients add high quality capacity and specialist expertise. Our services are sought after by leading companies across Europe and Asia. Making these services easy to use enables our clients to Think Big and grow their businesses more profitably.
